FOR IMMEDIATE RELEASE

Polarion Software Gives Developers Free and Open Source Tools for Subversion

Polarion® SVN Solutions for Subversion™ provides all the necessary tools for taking full advantage of industry's leading revision control system

Research Triangle Park, North Carolina, September 10, 2007— Polarion Software, creators of fully integrated application lifecycle management solutions and services, today announced the availability of free and open source tools for Subversion (SVN), the industry's leading revision control system. Polarion® SVN Solutions for Subversion™ provides all the necessary tools and resources for developers to take full advantage of Subversion development, including project importers, Eclipse plug-ins and training curriculums.

"Subversion is rapidly becoming the dominant standard for SCCM, overtaking other open source and commercial offerings with its powerful central repository for storing and versioning every change to source code, documents, and other forms of electronic data," noted Frank Schröder, CEO at Polarion. "Our extensive expertise with SVN has made Polarion the leading resource for companies wanting to make a smooth and successful migration to Subversion."

Polarion SVN solutions make it easy for distributed and multi-site development groups to work as unified teams in real-time, regardless of where they're located, and remove adoption barriers for organizations considering the transition to Subversion. Several tools have also been made open source so teams can reuse and extend them as needed while contributing to ongoing development in the growing Polarion Community.

Free Polarion Tools and Solutions

- **Polarion® FastTrack™ for Subversion:** A tracker plugin for the Eclipse IDE, providing robust issue tracking and basic SVN-based sharing from within Eclipse, is ideal for individual developers and micro-sized teams. FastTrack can also function as an Eclipse client for the Polarion ALM for Subversion 3.0 platform. More information is available at www.polarion.com/products/svn/fasttrack.php

- more -

- **SVN Express by Polarion®:** The fastest, easiest way to get started using Subversion, SVN Express bundles Subversion, Polarion FastTrack, Polarion's Subversive client for Eclipse, Polarion's web client for Subversion, and the company's complete suite of Subversion data migration tools. For more information, see www.polarion.com/products/svn/svn_express.php

- **Importer for SVN:** A set of Java-based tools from the Polarion Community that automates and eliminates risk when transitioning to Subversion from CVS, PVCS, Microsoft Visual SourceSafe, ClearCase, MKS, or StarTeam. For more information on this Polarion Community project, see http://www.polarion.org/index.php?page=overview&project=svnimporter

Polarion Open Source Tools and Solutions

- **Subversive Eclipse Client for Subversion: C**lient plugin delivers SVN integration for the Eclipse ecosystem, originally developed at the Polarion Community and now an Eclipse Technology project hosted by www.eclipse.org. Polarion provides the latest stable version for download at http://www.polarion.org/index.php?page=overview&project=subversive

- **SubTrain Open Source Subversion Training Curriculum:** The industry's first completely open-source training curriculum, comprising a set of Subversion course materials with predefined, easily customizable presentation slides plus supporting materials tailored to meet the training needs of teams and companies planning their transition. More on SubTrain is available at http://polarion.org/index.php?page=overview&project=subtrain

This announcement came in conjunction with the release of Polarion ALM for Subversion 3.0, which delivers the most comprehensive Application Lifecycle Management solution on the market. For additional information on all of Polarion's innovative ALM and Subversion solutions, visit www.polarion.com.

About Polarion Software
Polarion Software is a global leader of comprehensive application lifecycle solutions and services for effectively and efficiently managing the software development lifecycle. Polarion ALM for Subversion combines every major phase of managing the software development lifecycle into one comprehensive ALM platform that provides teams with the real-time information on the actual state of software development in their organization necessary to make intelligent, informed decisions, while leveraging Subversion and other advanced open source technologies to deliver unique functionality and a significant return on investment. Additional information is available at www.polarion.com.
